

PRODUCT SPECIFICATION

C5 Petroleum Resin (MK1288)

| | | | |
|----------------------|---|------------------------|------------------|
| Chemical Name | : C5 Aliphatic Hydrocarbon Resins, Petroleum Resins | | |
| HS Code | : 3911100000 | CAS number | : 64742-16-1 |
| UN Code | : Not Applicable | DG Class/PKG GP | : Not Applicable |
| Applications | : It is used in hot melt adhesive, hot melt type of pressure-sensitive adhesive or solvent type of pressure-sensitive adhesive, rubber compounding. | | |
| Packaging | : 25kg per kraft paper bag, 24MT per 40-ft FCL container with pallets | | |

| Characteristics | Unit | Guaranteed Values |
|--------------------------------|-------------|--------------------------|
| Appearance | - | Light Yellow Granular |
| Softening Points (Ring & Ball) | °C | 95 - 105 |
| Acid Number | mg KOH/g | 1.0 Max |
| Color | Ga # | 5 Max |
| Color Stability @200°C for 3h | Ga # | 8 Max |
| Bromine Value | Br g/100g | 25 Max |
| Melting Viscosity @200°C | cps | 250 Max |
| Ash | % | 0.05 Max |
